

# *How many strips from a yard of fabric?*

<i>Strip Size</i>	<i># of Strips</i>	<i>Strip Size</i>	<i># of Strips</i>
1"	35	7"	5
1.5"	23	7.5"	5
2"	17	8"	4
2.5"	14	8.5"	4
3"	11	9"	3
3.5"	10	9.5"	3
4"	8	10"	3
4.5"	7	10.5"	3
5"	7	11"	3
5.5"	6	11.5"	3
6"	6	12"	2
6.5"	5		

The above chart can seem misleading, since you should be able to get 36 - 1" squares out of 36" of fabric, however, due to uneven cuts at the fabric store, you often don't get a perfectly straight 36" cut. This takes that into account, so anything that divides evenly into 36 has had one strip subtracted from the number. Hence, 12" strips will only get you 2 strips even though you *might* get 3.
